PROFESSIONAL SUMMARY

Motivated B.Tech (Computer Science) Graduate (2024) with a practical foundation in Web Development. Passionate about building responsive, user-friendly websites and eager to launch a career in full stack development. Specialized in translating requirements into clean, error-free HTML/CSS/JS code. Available to join immediately.

TECHNICAL SKILLS

- Core Technologies: HTML5, CSS3, JavaScript, React.js and Node.js
- Web Design: Responsive Web Design, Flexbox, Grid Systems
- Tools: VS Code, Sublime Text, Git (Basics)
- Soft Skills: Time Management, Problem Solving, Adaptability

KEY PROJECTS

Netflix Clone

- Built a Netflix-style streaming UI clone using React.js and Vite, replicating core browsing and layout patterns of a modern streaming platform
- Implemented responsive movie/show banners, carousels, and navigation for a polished, production-like user experience
- Structured reusable React components for maintainability and fast iteration

Institutional Website Development

Designed and developed a fully functional website for a local school to digitize their information presence.

Tech Stack: HTML5, CSS3, JavaScript

- Created a responsive layout that works on both mobile and desktop screens
- Structured semantic HTML for better SEO and accessibility
- Implemented navigation bars, forms, and image galleries to showcase school facilities

Outcome: Successfully deployed a bug-free static site demonstrating mastery of core web layout concepts.
